

Data Safe Series S

The Data Safe Series S is a fireproof data safe with a 120-minute data rating — two hours of protection for tapes, disks and drives. Five sizes run from 71 to 590 litres, quoted in LTO tape capacity as well as volume. A data rating is stricter than a paper rating: magnetic and optical media are damaged at far lower temperatures than paper, and by humidity as well as heat, so a data safe must hold both down for the full two hours.
